

## Preventing Stillbirth in the United States

***The United States loses nearly 24,00 babies a year to stillbirth<sup>1</sup>.*** Stillbirth occurs in 1 out of 167 pregnancies nationally. We lose as many babies to stillbirth as we do to infant death before a child's first birthday. Within those distressing statistics, racial disparities paint a more startling picture. African American women experience stillbirth at twice the rate of the general pregnant population. Native American and Asian women, and mothers of Hispanic ethnicity, all have elevated rates of stillbirth as well. Parents of all races are ten times more likely to lose their baby to stillbirth than they are to SIDS, yet little prenatal education is dedicated to what can be done to prevent stillbirth.

### ***Count the Kicks is on a mission to change that!***

Count the Kicks<sup>2</sup> is a stillbirth prevention public health campaign that teaches pregnant moms to literally count their babies' movements daily in their third trimester. Our free mobile app makes it easier than ever to count kicks and even records a 21-day history, so a mom can see her baby's own kick patterns. Evidence shows that when moms know what is normal for their baby, they also are more aware of possible signs of distress and are empowered to speak to their medical provider. Count the Kicks has yielded tremendous success in Iowa, where the campaign got its start. In the first five years, Iowa's stillbirth rate decreased 26% and went from the 33<sup>rd</sup> worst to the 3<sup>rd</sup> best stillbirth rate in the country.

We are on a mission to reduce stillbirth by 26% in every state, just as we did in Iowa. *Nationally, that means saving the lives of 6,000 babies every year.* We achieved this in Iowa not only with mom-to-mom sharing, but through a strategic public health awareness campaign aimed at maternity care providers – OB/GYN clinics, birthing hospitals, childbirth education classes, visiting nurses, and social service providers. Our printed, mom-centered educational materials are available at cost in English and Spanish. Four states – Iowa, Illinois, Missouri, and Nebraska – have local funding agreements through health departments, foundation grants and/or private donations to ensure all our printed materials are free of charge across their states. Although our education materials are available for purchase, we would like to see them available free of charge to all providers across the US. We currently have no funding for dedicated national outreach but are actively seeking partners.

### ***We invite you to save babies with us!***

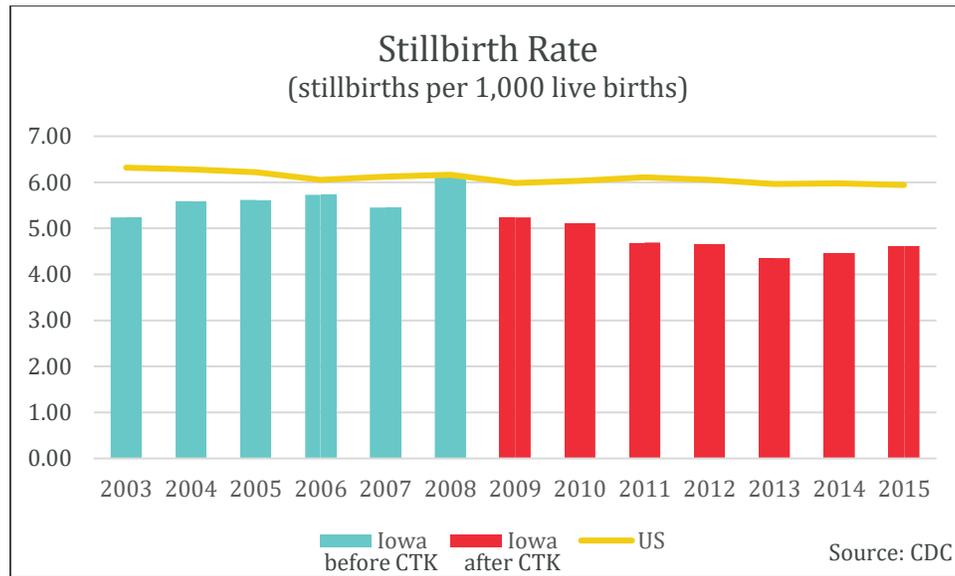

To learn more about how to launch Count the Kicks in nationally, please contact Executive Director, Emily Price, at [price.emily@healthybirthday.org](mailto:price.emily@healthybirthday.org) or Associate Director of Programs, Lina Tucker Reinders, at [reinders.lina@healthybirthday.org](mailto:reinders.lina@healthybirthday.org). You can also reach us by phone at 515.523.5MOM.

<sup>2</sup> Count the Kicks is a stillbirth prevention campaign of Healthy Birth Day, Inc., a 501(c)(3) organization based in Des Moines, IA.

## Stillbirth in the US

To fully launch Count the Kicks nationally, we would:

- Conduct a call and mail campaign with all known maternal health providers and offer our printed educational materials be sent to them for free
- Inform all maternal health providers of our free digital tools they can use to implement Count the Kicks into their practice, such as how-to videos and lesson plans for incorporating kick counting into prenatal classes
- Strategically place social media ads to expecting moms, encouraging them to download the free Count the Kicks app
- Hold a press conference with key stakeholders and invite national media and mom bloggers
- Have a presence at well-attended regional baby shows for direct mom-to-mom outreach
- Continue to tell the story of stillbirth prevention – and of racial disparities – in the media to raise awareness and influence more women to download the free Count the Kicks app
- Local media outreach for all babies saved as learn of them

To measure program implementation, we will track:

- Provider material orders, broken down by zip code
- Count the Kicks app downloads and use numbers, broken down by zip code
- Social media engagement
- National and local media attention

Program success will be measured by actual stillbirth numbers, as tracked by state departments of health and/or the U.S. Centers for Disease Control and Prevention.
